## **APP Instructions For HONITURE Q6 Pro**

#### 1. Connect to WiFi

① Download app: Scan the QR code with your mobile phone or search in Google Play Store (Android devices) / App Store (iOS devices) to download the **HonySmart app.** 

iOS: Compatible with Operating Systems 10 and higher.

Android: Compatible with Operating Systems 8.0 and higher.

- ② Sign up your account and login.
- ③ Click "+" in the upper right corner on the page and choose Q6 Pro.
- ④ Enter the correct WiFi name and password then click "Continue"

⑤ Press and hold the Power button for 3 seconds to turn on the robot. The robot will say "Turn on".

6 Press and hold the Power button and Recharge button at the same time for at least 3 seconds, until you hear the robot saying "WiFi has been reset" and the Power button flashes slowly in blue.

⑦ Click "Confirm power on key blue slow flash" and click "Next"

Click "Go to connect" and it will automatically jump to the setting page of your mobile phone.

④ Go to the WiFi setting page and find the "Smartlife-xxxxxx" hotspot network and click to connect to it.

(1) Return to the app and wait for the device adding to complete. Click "Done" to complete the connection.

#### 2. Four modes: Pin n Go/ Zone/ Room/ Auto Cleaning

Pin n Go Cleaning: When the robot is standing by or paused, you can specify a target point on the map in the app, and the robot will automatically plan a route to the specified location and clean the surrounding 1.6m \* 1.6m square area with itself as the center.
 Zone Cleaning: Click "Create area" to create the zone yous want to clean and the robot will clean the zones selected on the map.

③ <u>Room Cleaning</u>: You can set the Room Cleaning in the app, the robot will clean the rooms you select. You also can select the suction.

④ Auto Cleaning: The robot will clean the whole house.

#### 3. Virtual No-go/ No-mop area and virtual wall

#### Firstly click "Forbidden Zone" :

① Set up virtual No-go area/ no-mop area: Click "Add Forbidden Zone" in order to set up the no-go area. The robot will not enter the no-go area. (including cleaning mode and mopping mode)

② Set up virtual No-mop area: Click "No mop area" in order to set up the No-mop area. The robot will not enter the no-mop area in mopping mode.

③ Set up virtual wall: Click "Virtual Wall" and then click "Add a virtual wall " and move it. Don't forget to save them!

#### 4. Partition editing

## Please make sure that the robot vacuum has completed a cleaning, and the map will be automatically generated on the app before you can edit it.

① Merge rooms : Select two adjacent and different colored areas to merge.

② Divide room : Select a single area split. Tap the screen and when a line appears, move two points to divide the room.

③ Area naming : Click "Area naming" and then select the room to modify the name.

④ Custom mode : Click the room to modify the mode. You can choose the suction power and water regulation.

#### 5. Only mop

① Only when the robot is equipped with a mopping cloth can the Only mop mode be turned on.

2 The difference between turning on the only mop mode and not turning it on: In only mop mode, the robot will not clean, and you cannot choose the suction power.
3 There are three levels of water output to choose from.

#### 6. More function :

#### Click "More" firstly

①Schedule: You can add a schedule in the app to set your desired schedule/ frequency/ selected area (auto cleaning or select specified room cleaning).
